

# Cultural Event Mapping of the Russian Far East

Project Title	Cultural Event Mapping of the Russian Far East
Project Summary	Identify and map cultural events and organizations in the Russian Far East to support civil society, people-to-people ties, and cultural event planning for the Community Liaison Office and Public Affairs Section of the U.S. Consulate in Vladivostok.
Country	Russia

## Project Description

Civil society in the Russian Far East has been marginalized by a myriad of laws and restrictions which have effectively nationalized most large cultural events and spaces, meaning that the opportunities for Americans to engage with average Russians are generally limited and state-controlled. The U.S. Consulate Public Affairs Section is regularly looking for new local partners with whom we can organize events for visiting speakers or performance groups, as well as film showings, English conversation clubs, and other programs. The Community Liaison Office is in charge of identifying and organizing events that may be of interest for American Consulate staff to attend. In this way, both sections are interested in identifying local events, venues, and event organizers (individuals, organizations, businesses).

This project will consist of two main activities: 1). Scan local media for events and add them to a calendar, 2). Identify points of contact, social media pages, or other contact information for the organizers of the events, and add them to a database
